Statements and Declarations

Funding
The author declares that no funds, grants, or other financial support were received during the preparation of this manuscript.

Competing Interests
The author has no competing financial or non-financial interests to declare that are relevant to the content of this article.

Author Contributions
Mustafa Cavus is the sole author and is exclusively responsible for the study conception, methodological framework design, statistical survival modeling, model explainability workflows, empirical data analysis, and manuscript drafting and revisions.

Data Availability
The dataset analyzed during the current study is publicly available in the ScienceDirect repository via *Data in Brief* under the persistent identifier DOI: https://doi.org/10.1016/j.dib.2018.11.126.

Code Availability
The complete reproducible experimental pipeline, machine learning tasks, survival model training routines, and time-dependent explainer scripts are openly available in the study's repository: https://github.com/mcavs/explainable-hotel-booking-cancellation-predictive-models.

Target Journal and Collection
Submitted for consideration to *Information Technology & Tourism* (Springer Nature) for the Special Collection on **"Ethics of Digital Transformation in Tourism and Hospitality"**.
